SCCO vs. Copper: daily return relationship

BHP vs. Copper: daily return relationship

FCX vs. Copper: daily return relationship

Key insights:

- Copper's up ~100% since 2018, but SCCO's stock is up 435% — the stock market seems to react more strongly than the metal itself.
- FCX swings about 2x more than copper day to day, since it's a pure copper-mining company.
- March 2020 (COVID crash) was the most volatile month for everything in this data, especially FCX.
- In Sept 2025, FCX dropped 17% in a day while copper barely moved — turned out to be a mine accident, not a price issue. Shows a mining stock isn't only about the commodity price.
